PROFILE SUMMARY

An Informatics undergraduate student at Universitas Kristen Duta Wacana, with a strong interests in Artificial Intelligence and Deep Learning. I am familiar with programming languages such as Python, HTML, CSS, and SQL, developed through academic coursework and projects. I have actively participated in students organisations and committees, where I developed skills in responsibility, time management, and teamwork.

EDUCATION

Universitas Kristen Duta Wacana – Yogyakarta

August 2022 - June 2026

Major : Informatics

GPA : 3.75/4.00

WORK EXPERIENCE

Software Developer Intern

September - December 2025

BMKG Yogyakarta – Stasiun Geofisika Sleman

- Developed a desktop-based application using Python and Tkinter to help staff record and monitor daily sensor data.
- Integrated a local database for secure data storage and easy retrieval of daily sensor records.
- Developed a feature to automatically generate daily reports in PDF format based on the database records.

Assistant Lecturer

September 2023 - December 2025

Universitas Kristen Duta Wacana

- Assisted lecturers in practical classes for Computer Technology, Algorithm and Programming, and Data Structures.
 - Delivered academic materials, guided lab sessions, and supported students' understanding of programming fundamentals
 - Created, administered, and graded practical assignments and exams
-

ORGANISATION EXPERIENCE

Vice Leader

February 2024 - December 2024

Himpunan Mahasiswa Teknik Informatika

- Partnered closely with the leader to manage the organisation
- Coordinated project timelines for all departments
- Led internal meetings and discussed progress with department members

Secretary II

February 2023 - December 2023

Himpunan Mahasiswa Teknik Informatika

- Handled administrative tasks such as filing, scheduling, and organisation inventory
 - Organised schedules, recorded meeting results, and maintained documentation for future use
 - Managed official letters and e-mails for the organisation
-

ACHIEVEMENT

2nd Place – Student Category

15 February 2025

SPARK Telkomsel 2025 – AI Datathon Competition

- This competition was organised by Himpunan Mahasiswa Elektroteknik ITB and supported by Ikatan Alumni Elektro ITB, PT Bangunindo Teknusa Jaya, Google, and Telkomsel
 - Contributed to the front-end development of CliniCode, a healthcare web app for ICD-10 coding, using HTML, CSS, and PHP.
-

PROJECTS

MedTime

2025

National Funded Project – Student Creativity Program (PKM-PM)

- Developed an Android-based application using Kotlin to assist nursing home staff in managing and monitoring medication schedules for the elderly.
- Registered the official Copyright (HKI) for the application.

Foodiefy

October - December 2024

Bangkit 2024 Batch 2 Capstone Project – Machine Learning Learning Path

- Developed Foodiefy, an AI-powered nutrition management application.
 - Contributed to building a deep learning model for classifying fresh and rotten fruits using Convolutional Neural Networks (CNN) with Python and TensorFlow.
-

SKILLS

- Programming Language : Python, HTML, CSS, PHP, Kotlin
 - Database Management : SQL (SQLite, MySQL)
-

LANGUAGES

- Indonesian (Native)
- English (Intermediate)
